

# FRENCH BEAN (Fine)

## GOAL

### DISEASE RESISTANCE OR TOLERANCE

Bean Common Mosaic Virus.  
Antracnose and Rust

## TRIAL DATA

DAYS TO MATURITY	60
POD LENGTH	10.5 - 12.5 cm
POD WIDTH	6.5-8 mm
POD SECTION	Round
PLANT HEIGHT	50 cm
PLANT HABIT	Bush
SUITABILITY	Pre-Pack & Fresh market

## FEATURES

- Early maturing Fine bean most suitable for hand picking over a longer period of time
- Strong plants
- Long flowering period
- Dark green pod colour

HR= High resistance FT=Field tolerance in Kenya  
Ua-Rust, Bmv-Bean common mosaic virus, Cl-Anthrachnose,

# GENERAL BEAN GROWING GUIDE

FOLIAR FEEDING		BEAN DISEASES	REMEDY
Sowing	Direct drilling and transplanting	Seedling	Bean fly Thiamethoxam Sporekill
1 <sup>st</sup> two weeks	Kic start - 2ml/L water Fosfaspray - 5g/L water Sporekill - 0.5ml/L water		Fusarium, Pythium Rhizoctonia Fosfaspray Kic start
1 <sup>st</sup> Month	Nitrospray - 2ml/L water Hyperfeed - 5g/L water Hygroboost Flo- 2ml/L water Seamaxx - 2.5ml/L water	Foliar diseases	
2 <sup>nd</sup> Month	Hyperfeed - 5g/L water Sporekill - 1ml/L water Calmabon- 2ml/L water Liquicop - 2ml/1L water		Rust Sporekill
3 <sup>rd</sup> Month	Sporekill - 1ml/L water Calmabon- 2ml/L wate Copttrace - 2ml/1L water		Anthracnose Liquicop
			Halo blight Hygroboost Flo
			Common mosaic virus
		Soil borne diseases	
			Fusarium/pithium Perlka
			Nematodes Mustard caliente
		Post-harvest	
			Black and grey mould Vapour guard Avoshine
		General Pests	
			Thrips and aphids Acaricides
			White flies Chlorantraniliprole
			Bean fly
			Leaf miners
			American bollworm
		Others	
			Weeds Glyphosate

## Size / ukubwa

Length / urefu

10.5-12.5 cm

Width / Unono  
6.5-8 mm

## Days to harvest / siku za kukomaa

60 days

Direct / hupandwa moja kwa moja

## Sowing Season / msimu wa kupanda

## Depth / undani wa kupanda

↓  
1-2 cm

## Spacing / umbali mmea kwa mmea

20 cm x 5 cm

## Watering / kuweka maji

Water regularly / mara kwa mara
